

## BEARDSLEY ST PATCH & OVERLAY PROJECT

October 18, 2019

There is a project starting next week to patch and overlay Beardsley St from Marketplace Dr to 80th Ave. Please be patient as this will require detours and delays for residents in the Ridge area and for through traffic.

Starting Monday, Oct. 21, Beardsley St will be closed from Echo Ridge Trail to 80th Ave. Beardsley St intersections at Echo Ridge Trail and 80th Ave will remain open during this phase.

The week of October 28, work will occur from just east of Marketplace Dr to just east of Echo Ridge Trail. Fontana Ct residents should expect delays as they will need to wait for a pilot car to access to/from their property.

A HMA overlay is scheduled to be placed over the entire stretch from Marketplace Dr to 80th Ave after the patching and leveling course is completed. This is expected to occur around Nov. 2. Schedule is of course dependent on many factors and subject to change. Please monitor the City's Facebook page or website for updates.

Detoured traffic should use North Ave or Echo Valley Dr to reach their destination.
